INDEX

	Bulletin no.	Page
ABBOT, W. S.:		
Effectiveness against the San Jose Scale of the Dry Substitutes for Liquid Lime-Sulphur. With J. J. Culver and W. J. Morgan	1371	1–27
Results of Experiments with Miscellaneous Substances against Bedbugs, Cockroaches, Clothes Moths, and Carpet Beetles. With E. W. Scott and J. E. Dudley, Jr	707	1–36
Results of Experiments with Miscellaneous Substances against Chicken Lice and the Dog Flea	888	1–15
Abbreviations, titles of periodicals in Experiment Station Record. F. A. Bartholow	1330	1–160
Abies spp.—		
descriptive key	327	43
disease list	1366	11–13
Abíu, description and uses	445	22
Abortion, cow—		
control	106	49–54
relation to granular venereal disease. W. L. Williams	106	1–57
Absorption, colloidal and noncolloidal soil constituents. M. S. Anderson, W. H. Fry, P. L. Gile, H. E. Middleton, and W. O. Robinson	1122	1–20
Acacia—		
culture in California, history	9	6–8
description and use for city streets	816	20–21
economic—		
study. C. H. Shinn	9	1–38
uses	9	9–34
extent and nomenclature	9	1–2
propagation and management	9	34–37
spp., characteristics	9	3–6
sweet, diseases	1366	13
Acala Cotton Growers' Association of the Coachella Valley, work	1467	6–7, 22, 24, 26, 28, 30, 43
Accounting—		
farm costs, principles, and plans	994	15–38, 46–47
records—		
cooperative milk plants	1095	29–36
country creameries. J. R. Humphrey and G. A. Nahstoll	559	1–37
for sampling apples by weight. J. H. Conn and A. V. Swarthout	1006	1–13
self-service stores, recommendations	1044	39–49, 50–52
system—		
cooperative fruit associations. G. A. Nahstoll and W. H. Kerr	225	1–25
cotton ginneries. A. V. Swarthout and J. A. Bexell	985	1–42
fruit-shipping organizations. G. A. Nahstoll and J. R. Humphrey	590	1–60
grain elevators	811	1–53
Accounts—		
apple sampling, records and forms	1006	2–13
cooperative stores	381	1–55
country creameries, records. J. R. Humphrey and G. A. Nahstoll	559	1–37

	Bulletin no.	Page
Accounts—Continued.		
ledger, for creameries, classification. G. O. Knapp, B. B. Mason, and A. V. Swarthout	865	1–40
livestock shipping association, description and details	1150	18–23
system for—		
cotton warehouses. R. L. Newton and J. R. Humphrey	520	1–32
farmers' cooperative elevators. J. R. Humphrey and W. H. Kerr	236	1–30
livestock shipping associations—		
Frank Robotka	1150	1–52
J. R. Humphrey and W. H. Kerr	403	1–15
primary grain elevators. J. R. Humphrey and W. H. Kerr	362	1–30
systems, description	178	2–5
See also Bookkeeping.		
Acer spp.—		
disease list	1366	13–15
See also Maple.		
Acetate of lime, yields per cord from certain hardwoods	508	3–7, 8
Acetic acid, yield from distillation of hardwoods, investigations and experiments	129	7–8
Achras sapota, disease	1366	15
Acid(s)—		
development in grapes during ripening. W. B. Alwood, B. G. Hartmann, J. R. Eoff, M. J. Ingle, and S. F. Sherwood	335	1–28
effect on mortar and concrete, bibliography	1314	26–33
lands, utilization by means of acid-tolerant crops. F. V. Coville	6	1–13
organic salts of, fermentation in milk	782	19–29
phosphate—		
double, manufacture	144	25–26
manufacture—		
W. H. Waggaman	144	1–28
methods	144	12–23
theoretical basis	144	5–6
production cost	144	23–24
proportion necessary in jellies	1323	12–15
variation, effect in making citrus jellies	1323	13–15
Acidity, factor in tests of soundness of corn. H. J. Besley and G. H. Baston	102	1–45
ACKERMAN, A. J.: Two Leaf Hoppers Injurious to Apple Nursery Stock	805	1–35
Aconitum sp., disease list	1366	16
Acrobasis—		
hebescella. *See* Pecan nut case-bearer.		
nebulella. *See* Pecan leaf case-bearer.		
spp., history and synonymy	571	2–3
ADAMS, G. H.: Inspection of Fruit and Vegetable Canneries. With F. B. Linton, J. R. Garner, and A. S. Daggett	1084	1–38
ADAMS, L. A.: Consumer Habits and Preferences in the Purchase and Consumption of Meat. With K. B. Gardner	1443	1–64
Adenoma, definition and structure	1449	29–30
Adhesives—		
cactus solution in arsenical sprays for insects. M. M. High	160	1–20
fish oil, efficiency in arsenate-of-lead sprays. C. E. Hood	1439	1–22
need for, in spraying operations	1439	2
Adsorption method of estimating colloidal material in soils. P. L. Gile, H. E. Middleton, W. O. Robinson, W. H. Fry, and M. S. Anderson	1193	1–42
Aegeria pyri, synonymy	887	2
Aeration, milk—		
effect on flavor and odor	1190 1208	8–9 5–6
value and methods	1097	21–22, 23
Aesculus spp., disease list	1366	16

	Bulletin no.	Page
Agaricaceae, key to genera and description of species	175	5–37
Agaricus campestris. *See* Mushroom(s).		
Agaristidae, hosts of *Compsilura concinnata*, discussion	1363	20–22
Agave spp., feeding to range stock, description and value	728	7, 8, 9, 13, 15
Age, dairy cows and farm work horses, influence on value. J. C. McDowell	413	1–12
Agency, legal phase of corporations	1106	31–34
Agricultural—		
colleges, extension work, 1913	83	8–10
development in Alaska, possibilities. Levi Chubbuck	50	1–31
education, home projects, development, outlines, and problems	346	2–20
extension—		
and farmers' institutes, work in United States, 1913. John Hamilton	83	1–41
work—		
1913, statistics	83	34–40
in foreign countries, notes, and farmers' institute work in the United States in 1914. J. M. Stedman	269	1–21
implements, manufacture from basswood	1007	42–43, 58
products, American, German market for. G. B. L. Arner	1399	104–112
supplies, cooperative purchase in Denmark	1266	60–74
survey of Europe—		
Germany. L. G. Michael	1399	1–112
the Danube Basin. Pt. 1. L. G. Michael	1234	1–111
training courses for employed teachers. E. R. Jackson	7	1–17
Agriculture—		
correlation with public-school subjects in the Northern States. C. H. Lane and F. E. Heald	281	1–42
correlation with public-school subjects in the Southern States. C. H. Lane and E. A. Miller	132	1–41
Department of, work with Florida orange	63	13–14
elementary, for Alabama schools, lessons outlined by months. E. A. Miller	258	1–36
foreign, handbook of statistics. Frank Andrews	987	1–69
Germany, survey. L. G. Michael	1399	1–112
home practice, school credit for. F. E. Heald	385	1–27
secondary, courses—		
for southern schools—		
(First and second years.) H. P. Barrows	521	1–53
(Third and fourth years.) H. P. Barrows	592	1–40
home projects. H. P. Barrows	346	1–20
in public schools, plan for Northern States	281	1–42
in secondary schools, use of land. Eugene Merritt	213	1–12
Agropyron sp., disease list	1366	16
Agrostideae genera—		
key	545	5
key and descriptions	772	13–15, 121–165
Agrostis spp., disease list	1366	17
Ailanthus—		
description and use for city streets	816	21
sp., diseases	1366	17
AINSLIE, C. N.: The Western Grass-Stem Sawfly	841	1–27
AINSLIE, G. G.:		
Biology of the Lotus Borer (*Pyrausta penitalis* Grote). With W. B. Cartwright	1076	1–14
The Lesser Corn Stalk-Borer. With Philip Luginbill	539	1–27
Air—		
circulation, effect on drying wood	1425	6, 7–8
forced, method of cooling hot-bottled pasteurized milk. S. H. Ayers, J. T. Bowen, and W. T. Johnson, Jr	420	1–38
seasoning of western softwood lumber. F. V. Fullaway, Jr., H. M. Johnson, and C. L. Hill	1425	1–60
Aircraft, woods for, drying schedule	1136	38–39

	Bulletin no.	Page
Airplane(s)—		
cloth—		
manufacturing and laboratory tests	882	7–48
specifications of Signal Corps and tests	882	2–6, 26–27
cotton fabric for, manufacturing and laboratory tests. Fred Taylor and D. E. Earle	882	1–48
types used in dusting cotton, and cost of operation	1204	38–40
use in dusting cotton. B. R. Coad, E. Johnson, and G. L. McNeil	1204	1–40
woods, decays and discolorations. J. S. Boyce	1128	1–52
Akron Field Station, Colorado. *See* Colorado, Akron Field Station.		
Alabama—		
beef calves, raising and fattening. D. T. Gray and W. F. Ward	73	1–11
birds, reports from observers	1165	9–10, 24
calf-feeding, 5 years' work. W. F. Ward and S. S. Jerdan	631	1–54
cattle fattening, investigations. D. T. Gray and W. F. Ward	110	1–41
cotton cooperatives, organization	1392	13
cottonseed, yields of oil and meal, by counties and months	948	8–23, 202
Experiment Station, bulletins, list—		
1883–1920	1199	1–6
1921–22	1199, Supp. 1	1
1923–24	1199, Supp. 2	1
1925–26	1199, Supp. 3	1
farms, value, income, and tenancy classification	1224	70–72
game laws, 1913	22	23, 38, 44, 48, 52
lumber cut, 1870–1920, value and kinds	1119	27, 30–35, 43–61
peach growing	806	4, 5, 7, 8, 9, 25
plantations, crops, acreage, location, labor, and tenancy	1269	2–7, 69–73, 75
road-building rock tests, results	1132	2, 51
Satsuma oranges, coloring. R. C. Wright	1159	1–23
schools, lessons in elementary agriculture, outlined by months. E. A. Miller	258	1–36
steers, fattening on summer pasture, 1912, 1913	777	3–11
tenant farms, size and value	1432	4, 5, 7, 9
wheat—		
acreage, by varieties	1074	208
varieties and acreage, 1919, 1924	1498	5
Alaska—		
agricultural development, possibility. Levi Chubbuck	50	1–31
blue-fox farming. F. G. Ashbrook and E. P. Walker	1350	1–35
cattle and sheep raising, discussion	50	25–27
climate, influence on reindeer grazing	1423	17–19
experiment stations, bulletins, list—		
1902–20	1199	6
1923–24	1199, Supp. 2	1
1925–26	1199, Supp. 3	1
farming, examples of success	50	11–22
forage plants for reindeer	1423	20–30
game laws, 1913	22	23, 38, 44, 48, 52
homesteaders, difficulties	50	27–28
interior, topography, climate, and vegetation	50	5–9
mountain systems, descriptions	50	2–5
paper industry and pulpwood resources	1241	53–55
range plants, check list	1089	70–74
reindeer—		
Seymour Hadwen and L. J. Palmer	1089	1–74
grazing, progress of investigations. L. J. Palmer	1423	1–37
industry	50	22–25

	Bulletin no.	Page
Alaska—Continued.		
soil conditions, relation to forage vegetation	1423	19–20
soils, characteristics	50	9–10
source of paper supply, importance	950	3–5
Tongass National Forest—		
location	950	5–8
pulpwood resources, regional development. C. G. Smith	950	1–40
Alberta, game laws, 1913	22	34, 42, 47, 50, 58
ALBIN, H. C.: The Prevention of Breakage of Eggs in Transit When Shipped in Carlots. With M. E. Pennington, H. A. McAleer, A. D. Greenlee, and F. X. Dailey	664	1–31
Alcohol (s)—		
agricultural, manufacture in Germany, studies. Edward Kremers	182	1–36
ethyl—		
analysis, methods	983	17–19
manufacture from wood—		
apparatus and methods	983	16–17
processes	983	6–15
waste. F. W. Kressmann	983	1–100
waste, patents, list	983	98–100
sources and production cost	983	1–2, 67–68
fermentation in milk, studies	782	17–19
manufacture—		
problems, review	182	1–20
taxation methods, Germany	182	3–7
production from cherry juice, experiment	350	22
test—		
for determining quality of milk for condenseries. A. O. Dahlberg and H. S. Garner	944	1–13
in relation to—		
fresh milk from a single cow or small herd	202	3–7
market milk	202	7–25
milk. W. T. Johnson, Jr., and S. H. Ayers	202	1–35
with milk, titration method	202	25–30
wood, yields from destructive distillation of hardwoods, investigation and experiments	129	1–16
yield per cord from certain hardwoods	508	3–7, 8
yields from various woods	983	56–59, 69–83
Alcoholic liquors, foreign trade, 1905–14	296	36–38
Aldehyde (s)—		
in soils, harmful effects. Oswald Schreiner and J. J. Skinner	108	1–26
occurrence in garden and field soils	108	12–22
repellent action against screw-worm flies	1472	23
salicylic, effect on plants	108	3–5, 22–24
ALDEN, C. H.:		
Dusting and Spraying Peach Trees after Harvest for Control of the Plum Curculio. With O. I. Snapp	1205	1–19
Experiments on the Control of the Plum Curculio, Brown Rot, and Scab, Attacking the Peach in Georgia. With O. I. Snapp, J. W. Roberts, J. C. Dunegan, and J. H. Pressley	1482	1–32
Further Studies with Paradichlorobenzene for Peach Borer Control. With O. I. Snapp	1169	1–19
The Cankerworms. With B. A. Porter	1238	1–38
Alder—		
disease list	1366	18
red—		
characteristics of growth and yield	1437	33–36
in the Pacific Northwest, volume tables	1437	40–42

	Bulletin no.	Page
Alder—Continued.		
red—continued.		
lumbering, methods in Pacific Northwest	1437	25–29
Pacific Northwest, utilization, growth, and management. H. M. Johnson, E. J. Hanzlik, and W. H. Gibbons	1437	1–46
producers and consumers in Pacific Northwest, directory	1437	44–45
stumpage, log, and lumber values	1437	31–32
timber of, supply and annual consumption	1437	3–5
use by furniture industry of Pacific Northwest	1437	18–22
uses, classified list	1437	43
utilization by industries in Pacific Northwest	1437	15–25
wood, properties of	1437	5–10
Ales, American, study. L. M. Tolman and J. G. Riley	493	1–23
Aleurocanthus woglumi—		
technical description	885	39–42
See also Citrus black fly.		
Aleurone—		
corn, color and texture of endosperm, correlation	754	65–97
inheritance of color, experiments	754	30–31, 35, 38, 40, 44, 45, 48–49, 52, 54–55, 61–65
Alfalfa—		
caterpillar—		
V. L. Wildermuth	124	1–40
control methods	124	29–40
distribution, history, and description	124	2–19
parasitic and other enemies	124	19–29
cultivation methods for control of chalcis fly	812	14–17
cured, comparative shrinkage in weight with leaves attached and removed. H. L. Westover	1424	1–11
cutting, effect on water requirement and its bearing on pasturage. L. J. Briggs and H. L. Shantz	228	1–6
disease list	1366	64–65
effect on subsequent yields of irrigated crops. C. S. Scofield	881	1–13
fertilizer experiments, United States Yuma Field Station, Bard, Calif., 1919–25. H. L. Westover and E. G. Noble	1418	1–11
flea-hopper injury and control. A. H. Beyer	964	1–27
flower, structure and pollination, investigations	75	2–9
flowers, tripping, automatic, results	75	19–24
green, feeding to cows, effect on milk flavor and odor	1190	2–9
growing—		
in Michigan, Lenawee County, studies	694	3, 9, 17–18, 27, 28–30
in northern Great Plains, experiments	1244	25–31, 42, 47
in sugar-beet area	995	34–35
labor requirements in Kansas	1296	37–40
injury by clover stem-borer	889	4–5, 10–11
inoculations with *Pseudopeziza* spp. cultures, experiments	759	19–28
insects, efficiency in tripping alfalfa flowers	75	12–16
irrigated, utilization as pasture for hogs, experiments	488	3–19, 24–25
irrigation experiments, California University Farm	10	2–10
labor—		
and seed requirements on farms in southwestern Minnesota	1271	41–44
requirements in Arkansas	1181	7, 25–26, 61
leaf spot, and red clover leaf spot caused by *Pseudopeziza* spp. F. R. Jones	759	1–38

Alfalfa—Continued.	Bulletin no.	Page
leaves, attached and removed, comparative weights in curing, experiments	1424	2–9
losses from leaf-spot disease	759	2–3
marketing problem in Yakima Valley	1388	16
moisture content at different stages	353	6–9, 23–24, 26–27
ozonium root rot of, symptoms and development	1417	1, 3, 4, 7–8, 10, 11
pasturing—		
for hogs	752	4–24
with hogs, experiments	1143	3, 8–9, 11, 13, 15, 17, 21
pest, clover-stem borer. V. L. Wildermuth and F. H. Gates	889	1–25
pods, effect of pollen from different sources	75	16–18
production in Yakima Valley, Wash	1388	35–37
root—		
abnormalities and causes	1087	6–8
development, factors influencing	1087	2–8
studies. Samuel Garver	1087	1–28
rotation(s)—		
experiments	881	2–12
with cotton, effect on crazy-top disorder	1484	12–17, 18–19
with sugar beets	721	33–34
seed—		
chalcis fly—		
T. D. Urbahns	812	1–20
control methods	812	14–17
development, relation to tripping	75	10–12
market statistics	982	214
production: Pollination studies. C. V. Piper, M. W. Evans, Roland McKee, and W. J. Morse	75	1–32
Turkestan—		
commercial. Edgar Brown	138	1–7
identification	138	5
value—		
in fattening rations for calves in Alabama and Mississippi	631	1–13, 21–53
United States	138	3–4
varieties, characteristic root systems, comparisons	1087	12–26
weevil—		
importance and spread in Utah	107	1–2
outbreaks in 1921	1103	21–23
relation to birds. E. R. Kalmbach	107	1–64
yellow-flowered, *Medicago falcata*. R. A. Oakley and Samuel Garver	428	1–70
yields in dry-land experiments, North Dakota	1293	6, 17
Algeria—		
agricultural statistics, 1910–20	987	2–3
citrus-fruit industry	134	33
fruits, production, imports, and exports, 1909–13	483	38–39
ALGUIRE, G. B.: Marketing Broom Corn	1019	1–32
Alizarol, test in relation to milk	202	30–32
Alkali(es)—		
content of—		
irrigated shale land	502	7–11
plants, determination	600	19–23
effect on concrete lining, irrigation canals	126	51–53
land, crop production experiments on Huntley reclamation project, Montana. Dan Hansen	135	1–19
production in milk, study	782	2–9
treatment, effect on cocoas. Eugene Bloomberg	666	1–20

	Bulletin no.	Page
Alkalinity, soil, bibliography	1314	5–10
Alkaloid(s)—		
identification by application of optical methods. E. T. Wherry	679	1–11
optical properties, measurement	679	8–9
production in belladonna, some effects of selection. A. F. Sievers	306	1–20
ALLARD, H. A.: The Mosaic Disease of Tobacco	40	1–33
Allegheny Plateau region, description and pomological features	1189	13–16, 75–77
ALLEMAN, DUDLEY: Marketing Eastern Grapes	861	1–61
ALLEN, KENNETH, discussion of flow of water in concrete pipe	852	92
ALLISON, F. E.: Field Experiments with Atmospheric-Nitrogen Fertilizers. With J. M. Braham and J. E. McMurtrey, Jr	1180	1–44
Allium spp., disease list	1366	17–18
Almond(s)—		
butter, preparation and containers for	1305	3, 14, 15, 16, 20
confection, preparation and uses	1305	4–5, 14, 15, 16, 20
descriptions, explanation of terms	1282	10–15
disease list	1366	20
growing districts in California	1282	2–3
oil—		
digestibility experiments	630	4–6, 17
Java, digestibility experiments	1033	5–6
paste, preparation and composition	1305	5–9, 14, 15, 16, 20
powder, preparation and advantages of use	1305	10–11, 14, 15, 16, 21
products—		
cost estimates	1305	13–17
manufacturing, equipment and processes	1305	15–21
salted, preparation, value, and cost	1305	2–3, 14, 15, 16, 18–19
utilization for various food products. A. F. Sievers and Frank Rabak	1305	1–22
varieties—		
grown in United States, descriptions and value	1282	20–140
identification key	1282	15–20
in United States. M. N. Wood	1282	1–142
relation to industry	1282	3–8
Alnus spp., disease list	1366	18
Althea rosea, disease list	1366	18–19
Alum—		
in foods	103	1–7
production from alunite	415	5–6
Aluminum—		
arsenate, composition	1147	13
occurrence in soils	122	5, 27
Alunite, recovery of potash from. W. H. Waggaman and J. A. Cullen	415	1–14
ALMY, L. H.: The Commercial Freezing and Storing of Fish. With E. D. Clark	635	1–10
ALWOOD, W. B.:		
Development of Sugar and Acid in Grapes during Ripening. With B. G. Hartmann, J. R. Eoff, M. J. Ingle, and S. F. Sherwood	335	1–28
The Chemical Composition of American Grapes Grown in the Central and Eastern States. With B. G. Hartmann, J. R. Eoff, S. F. Sherwood, J. O. Carrero, and T. S. Harding	452	1–20
Amaryllis belladonna, diseases	1366	19

	Bulletin no.	Page
Amazon Valley—		
Hevea rubbertree—		
C. D. LaRue	1422	1–70
plantations, possibilities	1422	36–46
Para rubbertree in, pathological study. J. R. Weir	1380	1–130
AMBLER, J. A.: Chemistry and Analysis of the Permitted Coal-Tar Food Dyes. With W. F. Clarke, O. L. Evenson, and H. Wales	1390	1–40
Ambrosia beetles—		
damage and control in timber	1490	5, 9, 10–11, 20, 40
spraying experiments	1079	10–11
Amelanchier sp., disease list	1366	19

cotton—		
cooperatives, organization	1392	10, 12, 16, 21, 22, 30
single-stalk culture, experiments and yields	526	16–19, 28–30
cottonseed, yields of oil and meal, by counties and months	948	24–41, 203, 207
Cypress Creek drainage district, plan recommended	198	10–20
Desha and Chicot Counties, Cypress Creek drainage district, report. S. H. McCrory, O. G. Baxter, D. L. Yarnell, L. A. Jones, and W. J. Schlick	198	1–20
Experiment Station, bulletins, list—		
1888–1920	1199	7–10
1921–22	1199, Supp. 1	1
1923–24	1199, Supp. 2	2
1925–26	1199, Supp. 3	2
farms, value, income, and tenancy classification	1224	72–74
game laws, 1913	22	11, 23, 39, 44, 48, 52
harvest labor, distribution, 1921	1230	31
labor requirements for specified crops. A. D. McNair	1181	1–63
lumber cut, 1870–1920, value and kinds	1119	27, 30–35, 43–61
national forests, shortleaf pine stand	308	48–51
oats, yields of several varieties	823	32–33, 67, 68
peach growing	806	4, 5, 7, 8, 26
plantations, crops, acreage, location, labor, and tenancy	1269	2–7, 69–73, 75
road-building rock tests, results	1132	3–4, 46, 51
slash rotting, investigations. W. H. Long	496	1–15
wheat—		
acreage, by varieties	1074	209
varieties and acreage, 1919 and 1924	1498	5
Arlington Experiment Farm—		
corn-growing experiments on seeding date	1014	3–11
experiments with—		
borax fertilizers in 1920	1126	4, 5–17, 25
small grains. J. W. Taylor	1309	1–28
soil and climate, description	1309	2–6
tests of oat varieties	99	19

	Bulletin no.	Page
Armillaria mellea, cause of death of chestnuts and oaks. W. H. Long	89	1–9
Army worm—		
fall, control with calcium arsenate	875	29
host of *Compsilura concinnata*	1363	22
ARMSBY, H. P.: The Use of Energy Values in the Computation of Rations for Farm Animals	459	1–29
ARNER, G. B. L.: The German Market for Agricultural Products	1399	104–112
ARNOLD, J. H.:		
A Study of Farming in Southwestern Kentucky	713	1–19
Crew Work, Costs and Returns in Commercial Orcharding in West Virginia	29	1–24
Farming in the Bluegrass Region	482	1–29
Influence of a City on Farming. With Frank Montgomery	678	1–24
The Business of Ten Dairy Farms in the Bluegrass Region of Kentucky	548	1–12
Aronia spp., disease list	1366	23
Arsenate(s)—		
comparison with arsenites as to toxicity	1147	36–38
of lead sprays, use of fish oil as adhesive with. C. E. Hood	1439	1–22
See also under parent compound.		
Arsenic—		
absorption by plant tissues	1316	10–12
analysis, method and apparatus	1316	6–7
determination in coal-tar food dyes	1390	20–23
effect on plants and animals	1316	2–6, 13–14
fatal dosage to bees	1364	23–26, 31
in hops. W. W. Stockberger and W. D. Collins	568	1–7
oxidation in arsenical dipping baths, studies on changes in degree. R. M. Chapin	259	1–12
oxides, chemical properties	1147	2–4
spray, deposits on fruits and vegetables	1027	1–58
Arsenical(s)—		
chemical properties, investigations	1147	2–20
combinations with fungicides and other materials	1147	13–20, 31–36, 51
dipping—		
baths, arsenic in, changes in the degree of oxidation, studies. R. M. Chapin	259	1–12
fluids, laboratory and field assay. R. M. Chapin	76	1–17
effect on pink bollworm in Mexico	1374	58–63
insecticides, experiments	278	1–41
physical properties, investigations	1147	20–23
properties, chemical, physical, and insecticidal. F. C. Cook and N. E. McIndoo	1147	1–58
solution, use on tick-infested cows, effect on milk yield	147	14–16
sprays—		
for insects, cactus solution as an adhesive. M. M. High	160	1–20
testing on various insects	1147	24–50
toxicity, comparative investigations	1147	24–50
use—		
against—		
bean beetles	1243	30–49
boll weevils, effectiveness	731	11–12
papaya fruit fly	1081	9–10
strawberry leaf beetles on roses	1357	28–33, 46–47
truck-crop insects in Louisiana	703	3–4, 13–19
for spraying fruit trees, effect on honeybees. N. E. McIndoo and G. S. Demuth	1364	1–32
Arsenious oxide, determination in dipping fluids, methods	76	4–8, 10–15

	Bulletin no.	Page
Arsenite—		
iron, use against cucumber beetles, experiments	160	18–19
zinc, use with cactus solutions against cucumber beetles, experiments	160	2–4, 10–11, 18
Arsine, effects on insects and seed germination	893	5–7
Artichoke(s)—		
aphid, injury in Louisiana and control	703	1–2, 3–4
canning, inspection instructions	1084	28–29
disease lists	1366	42, 50
insects injurious in Louisiana	703	1–5
use and cooking	123	27, 35
Artman, C. E.: Expense Factors in City Distribution of Perishables	1411	1–36
Arundinaria spp., diseases	1366	23
Ascaris—		
eggs, feeding to animals, experiments	817	31–43
infestation, relation to age of host	817	24–27, 44
lumbricoides, life history, observations. B. H. Ransom and W. D. Foster	817	1–47
spp., description of stages	817	2–24
Asclepias—		
eriocarpa—		
as a poisonous plant. C. D. Marsh and A. B. Clawson	1212	1–14
See also Milkweed, woolly-pod.		
galioides—		
chemical examination	800	20–25
See also Milkweed, whorled.		
mexicana—		
distribution and habits	969	3–4
Mexican whorled milkweed, as a poisonous plant. C. D. Marsh and A. B. Clawson	969	1–16
pumila, description and experimental use as feed	942	2–9
tuberosa, diseases	1366	23
verticillata var. *geyeri*, description and experimental use as feed	942	10–14
Ascomycetes, key to genera and description of species	175	54–55
Ash—		
content of flour, determination	1187	35–36
extraction from plants, method and equipment	600	19–23
sulphated, determination in coal-tar food dyes	1390	18–19
Ash (tree)—		
American, groups and species	299	6–10
characteristics and management. W. D. Sterrett	299	1–88
commercial species, demand and supply	523	2–15
disease list	1366	47–48
fomes, cause of heartwood rot	1128	37–38
form and development	299	25–32
kinds suitable to city streets	816	21
logs, spraying for insect control, experiments	1079	5–11
lumber—		
cut, by regions and species, 1910	299	2–4
prices	523	29–44
production, by States, 1920	1119	52, 58–59
sawed, 1913	232	23
planting in eastern United States	153	31–32
reproduction, methods	299	19–23
soil, moisture, and light requirements	299	7–18
species, commercial and silvicultural importance	299	11–17
stands, yield, and management	299	32–51
timber—		
bark, volume, and yield tables	299	52–88
diseases and insects	523	26–27
standing, value	523	45–47
use by industries	299	4–6

	Bulletin no.	Page
Ash (tree)—Continued.		
timber—continued.		
utilization. W. D. Sterrett	523	1–52
wood, characteristics	523	15–27

Experiments in Bulb Growing at the United States Bulb Garden at Bellingham, Wash	28	1–21
The Navel Orange of Bahia; with Notes of Some Little-Known Brazilian Fruits. With A. D. Shamel and Wilson Popenoe	445	1–35
Douglas fir—		
decay in Pacific Northwest. J. S. Boyce	1163	1–20
disease list	1366	86
experimental plantations	1264	23–27
growing and logging, northern Rocky Mountains	1494	5, 31–37
growth—		
rate and density	1200	44–46
relation to forest conditions in central Rocky Mountains	1233	3–151
history, characteristics, and habits	680	21–27
log prices, 1909–16	711	29–30
lumber—		
air seasoning, problems	1425	54–59
production, by States, 1920	1119	43, 56–57
migration	1200	38–40
pitch moth—		
Josef Brunner	255	1–23
injury and control	255	7–21
life and seasonal history	255	3–6
production and maintenance, costs	1493	32–34
regeneration, natural, in Pacific Northwest. J. V. Hofmann	1200	1–63
reforestration, natural factors	1493	7–15
region—		
logging. W. H. Gibbons	711	1–256
of, general situation	1493	5–15
requirements, climatic and soil	1200	4–10
rots, causes, entrance, description, and amount of injury	1163	3–17
seed production, distribution, and viability	1200	10–18
seedlings, resistance to heat, experiments	1263	5–13
silvicultural management	1200	46–54
slash disposal	1493	9–11, 20–23
stands in lodgepole pine regions	1499	8–9, 15–16, 21
timber growing and logging practice. T. T. Munger	1493	1–42
treatment by wood-preserving processes, strength tests	286	3–14
DOVE, W. E.: Some Biological and Control Studies of *Gastrophilus haemorrhoidalis* and Other Bots of Horses	597	1–52

	Bulletin no.	Page
Doves, mourning—		
banded, returns, 1920–23	1268	29
occurrence in alfaffa-weevil districts	1028	9
DOWNING, J. E.: The Shrinkage in Weight of Beef Cattle in Transit. With W. F. Ward	25	1–78
Drain tile—		
flow of water in. D. L. Yarnell and S. M. Woodward	854	1–50
sampling and testing methods	1216	78–84
Drainage—		
agricultural land, structure used. L. T. Jessup	1408	1–32
Arizona, by means of pumping from wells in Salt River Valley. J. C. Marr	1456	1–22
assessments, benefits	1207	9–21,51–63
Black and Boggy Swamps district, Hampton and Jasper Counties, S. C., report. F. G. Eason	114	1–21
cooperative, advantages and management	190	33–34
costs, Arizona	1456	18–19
county roads, methods and road foundations. E. W. James, V. M. Peirce, and C. H. Moorefield	724	1–86
Cypress Creek district, Desha and Chicot Counties, Ark., report. S. H. McCrory, O. G. Baxter, D. L. Yarnell, L. A. Jones, and W. J. Schlick	198	1–20
districts—		
assessments, study. G. R. Boyd and R. A. Hart	1207	1–70
southern Louisiana, description	71	22–53
dredged ditches, flow of water. C. E. Ramser	832	1–60
effectiveness by pumping from wells	1456	12–17
irrigated—		
land(s)—		
R. A. Hart	190	1–34
cost	190	32–33
investigations	190	2–4
results	190	31–32
shale lands. D. G. Miller and L. T. Jessup	502	1–40
Jefferson County, Tex. H. A. Kipp, A. G. Hall, and S. W. Frescoln	193	1–40
land—		
by means of pumps. S. M. Woodward and C. W. Okey	304	1–60
excavating machinery used. D. L. Yarnell	300	1–39
laws, State, practices in assessing benefits under study. G. R. Boyd and R. A. Hart	1207	1–70
Louisiana wet lands. C. W. Okey	652	1–67
methods, county roads, and road foundations. E. W. James, V. M. Peirce, and C. H. Moorefield	724	1–86
piping, suction and discharge, arrangement	304	43–48
pumping—		
machinery, necessary capacity	304	20–34, 56
plants, tests in Southern States. W. B. Gregory	1067	1–54
system—		
Arizona, description	1456	9–12
construction in shale lands	502	20–23
tile, studies at experimental plant	854	5–8
valley of Red River of the North, and overflow prevention, report. P. T. Simons and F. V. King	1017	1–89
wet lands of southern Louisiana. C. W. Okey	71	1–82
Drains—		
covered—		
for irrigated land, construction	190	25–28
protective devices	190	15–18
requirements for drainage of irrigated land	190	5–9
flushing, connections for	1408	29–30
irrigated land, construction and maintenance	190	24–29
structures for use with, description and use	1408	2–11
DRAKE, J. A.: A Study of Farm Management Problems in Lenawee County, Mich. With H. M. Dixon	694	1–36

	Bulletin no.	Page
Draper, W. F.:		
Convict Labor for Road Work. With J. E. Pennybacker and H. S. Fairbank	414	1–218
Report on Experimental Convict Road Camp, Fulton County, Ga. With R. H. Eastham and H. S. Fairbank	583	1–64
Dredges, types, construction, and operation	300	3–18,33–36
Drepanosiphina, genera of, description and key	826	31–32
Drought—		
effect on range and cattle management. J. T. Jardine	1031	1–84
problem, effect on cattle production	1031	1–4
resistance, Australian saltbush	617	7–8
Drugs, effect on—		
American foulbrood	809	32–34
Nosema infection of bees	780	44–45
Dry farming—		
experiments with spring cereals in Oregon	498	1–37
Montana, pasture crops for hogs. A. E. Seamans	1143	1–24
southeastern Wyoming. A. L. Nelson	1315	1–20
water storage in soil and utilization by spring wheat	1139	1–27
Dry-land farming, experiments in North Dakota	1293	1–23
Dry-matter content of grain, cottonseed, and flour, basis of determination of intrinsic values. E. G. Boerner	374	1–32
Dubois, C. N.: Distribution of the Classes and Varieties of Wheat in the United States. With J. A. Clark, J. H. Martin, K. S. Quisenberry, J. R. Hooker, and C. E. Leighty	1498	1–68
Duck(s)—		
banded, returns, 1920–23	1268	8–27
black—		
banded, returns, 1920–23	1268	17–23
description and food habits	720	1–14
farms, food plants, recommendations	205	19–25
foods, Bear River marshes, Utah. Alexander Wetmore	936	1–20
mallard—		
description and food habits	720	2–10
food habits. W. L. McAtee	720	1–36
stomach contents, vegetable and animal	720	16–35
migration records from birds banded in Salt Lake Valley, Utah. Alexander Wetmore	1145	1–16
shoal-water, food habits of seven American species. D. C. Mabbott	862	1–68
sickness—		
cause and remedies	672	15–24
in Utah. Alexander Wetmore	672	1–26
symptoms	672	7–11
southern black, description and food habits	720	14–16
wild—		
Bear River marshes, Utah. Alexander Wetmore	936	1–20
eleven important foods. W. L. McAtee	205	1–25
five important foods of. W. L. McAtee	58	1–19
food(s)—		
in sand-hill region of Nebraska. W. L. McAtee	794	37–79
propagation. W. L. McAtee	465	1–40
supplies	936	10–15
in Nebraska, annotated list	794	22–35
lead poisoning	793	1–12
wood, description and food habits	862	37–48, 49–67
Duckett, A. B.:		
Absorption and Retention of Hydrocyanic Acid by Fumigated Food Products. With E. L. Griffin, I. E. Neifert, and N. Perrine	1149	1–16
Paradichlorobenzene as an Insect Fumigant	167	1–7
Duckweeds, value as duck food, and description	205	3–5
Dudley, J. E., Jr.: Results of Experiments with Miscellaneous Substances against Bedbugs, Cockroaches, Clothes Moths, and Carpet Beetles. With E. W. Scott and W. S. Abbott	707	1–36

	Bulletin no.	Page
DUNEGAN, J. C.: Experiments on the Control of the Plum Curculio, Brown Rot, and Scab, Attacking the Peach in Georgia. With O. I. Snapp, C. H. Alden, J. W. Roberts, and J. H. Pressley	1482	1–32
DUNNING, DUNCAN: Some Results of Cutting in the Sierra Forests of California	1176	1–27

situation in Germany	1399	6, 18, 19, 23, 40–45
statistics—		
Austria, pre-war and 1919–22	1234	48–55
Czechoslovakia, pre-war and 1920–23	1234	71–75, 80, 81, 82, 84–88, 90–92
Hungary, pre-war and 1921–22	1234	16–19, 38, 42
Yugoslavia, pre-war and 1921–22	1234	95–101, 104–109
straw-worm, injury and life history	808	14–15
winter—		
experiments in Maryland and Virginia	336	30–34, 49–51
mosaic disease. H. H. McKinney	1361	1–11
Ryegrass, disease list	1366	60
Sabadilla seed(s)—		
insecticidal value, tests	1201	9, 10, 11, 14–16, 49, 53
powdered, use in mite control	1228	5, 9
Sacbrood—		
G. F. White	431	1–55

	Bulletin no.	Page
Sacbrood—Continued.		
diagnosis—		
by laboratory methods	671	10–11
prognosis, and treatment	431	48–52
symptoms and causes, study	431	10–30
virus, studies	431	28–30, 31, 34–46, 52–53
Saccharum officinarum. See Sugarcane.		
St. John, E. Q.:		
A Bacteriological and Chemical Study of Commercial Eggs in the Producing Districts of the Central West. With M. E. Pennington, M. K. Jenkins, and W. B. Hicks	51	1–77
A Study of the Preparation of Frozen and Dried Eggs in the Producing Section. With M. E. Pennington, M. K. Jenkins, W. A. Stocking, S. H. Ross, Norman Hendrickson, and W. B. Hicks	224	1–99
Salad plants, studies, lessons for movable schools	123	9–14
Salal, disease of	1366	48
Sales, farm products, practices and terms	266	17–23
Salicylic acid, preservative for cactus solution, experiments	160	14
Salina Experiment Station, range cattle growth, studies	1394	1–12
Saline(s)—		
and potash salts, Great Basin region. G. J. Young	61	1–96
collection by surface waters	61	27–32, 80, 81
deposits, description	61	32–39, 60–66
sources in Great Basin region	61	14–20
Salix spp., disease list	1366	94
Salmon, Cecil: Cereal Investigations on the Belle Fourche Experiment Farm	297	1–43
Salmon—		
canned, production, 1913	150	12–13
canneries—		
byproducts, description	150	32–36, 44–49
fish waste, amount, value, and character	150	16–22
waste, treatment on large scale, proposed methods	150	36–44
canning—		
byproducts plant, cost	150	49–52
technology	150	4–13
waste, chemical composition	150	23–25
digestibility and food value, experiments	649	12–13
packing industry in United States, location of canneries	150	13–16
waste, from canneries, disposal and utilization	150	25–31, 36–44
Salsify—		
disease list	1366	100–101
use as food	123 503	33 11
Salt—		
common, use in barberry eradication	1451	19–24
impurities, effect on percentage of calcium oxide in ash of dairy products	524	15–19
Salt River Valley—		
Arizona-Egyptian cotton, handling and marketing. J. G. Martin	311	1–16
description	654	4–11
drainage by means of pumping from wells. J. C. Marr	1456	1–22
Saltbush, Australian. Roland McKee	617	1–12
Saltbushes and their allies in the United States. G. L. Bidwell and E. O. Wooton	1345	1–40
Salts—		
alkali soil, bibliography	1314	10–17

	Bulletin no.	Page
Salts—Continued.		
inorganic, identification by microscope, tables. W. H. Fry	1108	1–22
use in wood preservation, toxicity to fungi. C. J. Humphrey and R. M. Fleming	227	1–38
Saltusaphidina, genera, description and key	826	6, 30–31
Sambucus—		
canadensis, habitat, description, and uses	26	15–16
spp., disease list	1366	95
Sampler, grain, modified Boerner. E. G. Boerner and E. H. Ropes	857	1–8
Sampling—		
device, for grain, seeds, and other material. E. G. Boerner	287	1–4
grain, conversion of weights into percentages	516 574	1–21 1–21
Sampson, A. W.:		
Climate and Plant Growth in Certain Vegetative Associations	700	1–72

Shearing sheds, cooperative, in New Zealand	313	31
Shed(s)—		
market, types and description	1002	14–15
open, for dairy cows, comparison with closed barn. T. E. Woodward, W. F. Turner, W. R. Hale, and J. B. McNulty	736	1–15
shearing, cooperative, in New Zealand	313	31
Sheep—		
breeds, classification by wool types	94	4–5
care of, on farm	20	11–35
domestic breeds in America. E. L. Shaw and L. L. Heller	94	1–59
establishment on farm	20	3–10
feeding—		
directions	20	35–46
with—		
death camas, experiments, symptoms and results	1012	3–8, 17–20
sneezeweed, experiments	947	7–15, 19–22, 23–30, 31–38
stagger grass, experiments	710	5, 7–11
woolly-pod milkweed, experiments and results	1212	4–13

	Bulletin no.	Page
Sheep—Continued.		
flock management in Australia	313	8–9
grazing—		
benefits to forest	738	25–27
in bluegrass region	397	11–12
injury to western yellow pine, reproduction in central Idaho	738	6–25
immunity to cattle-grub attack	1369	22
industries of United States, New Zealand, and Australia, comparison. F. R. Marshall	313	1–35
industry, Minidoka Reclamation Project. E. F. Rinehart	573	1–28
judging, instruction in secondary schools. H. P. Barrows	593	1–31
labor and feed requirements on farms in southwestern Minnesota	1271	61–63
lime-sulphur dipping baths, field test	163	1–7
maintenance costs	20	49–50
management—		
methods on Minidoka Project	573	6–25
on the farm. E. L. Shaw and L. L. Heller	20	1–52
on the range	790	48–55
market—		
classes and grades	1360	35–42
statistics	982	69–90, 91–99, 141–142
Merino—		
divergence of standards of Australia and United States	313	10–14
type, origin, history, and value	94	6–10
muscle and viscera, vitamin content, studies	1138	12–14, 25–27, 28, 35–38
mutton type, description	593	10–14
poisoning by—		
Asclepias mexicana, experiments	969	4–16
cockleburs, experimental feeding and results	1274	10–11, 12–18
lupines, description	405	21–25, 30–41
meadow death camas, experiments	1240	3–5, 7–11
milkweeds, experiments and results	942	3–14
Nuttall's death camas, experiments	1376	3–12
oak leaves, experiments	767	1, 7, 13, 16
plants on the range, symptoms and prevention	1245	4, 5, 7, 13–30
rayless goldenrod, experiments	1391	6, 8–9, 11–24
whorled milkweed, experiments	800	1–4, 8, 9–12, 17–20, 26–38
Zygadenus, experiments	125	8–29, 30–34
production, importance on Government reclamation projects	573	1–2
raisers, cooperative association in Australia	313	33–34
raising in Alaska	50	25–27
shearing, methods	20	47–48
use in eradication of Rocky Mountain spotted fever tick, experiments. H. P. Wood	45	1–11
value on the farm	20	2–3

chemical composition, variation. W. O. Robinson, L. A. Steinkoenig, and W. H. Fry	551	1–16
classification for different varieties of apples	140	51–65
Clyde series—		
J. A. Bonsteel	141	1–60
crop uses and adaptations	141	48–59
geographical distribution	141	2–4
geological origin	141	4–7
topographic relationships	141	11–19
type descriptions	141	19–48
colloidal material—		
estimation by adsorption. P. L. Gile, H. E. Middleton, W. O. Robinson, W. H. Fry, and M. S. Anderson	1193	1–42
properties. M. S. Anderson and Sante Mattson	1452	1–47
study	1311	8–12

	Bulletin no.	Page
Soil(s)—Continued.		
colloids. *See* Colloids, soil.		
conditions—		
acid and neutral, action of manganese under. J. J. Skinner and F. R. Reid	441	1–12
effects on brown root rot	1410	14, 17, 25–26, 27
relation to the rosette of pecan trees. J. J. Skinner and J. B. Demaree	1378	1–16
Connecticut, with special reference to apples and peaches. H. J. Wilder	140	1–73
constituents, colloidal and noncolloidal, absorption. M. S. Anderson, W. H. Fry, P. L. Gile, H. E. Middleton, and W. O. Robinson	1122	1–20
crop relations, southern New Jersey, discussion	677	9–54
deficiencies, effect on pecan rosettes. S. M. McMurran	756	1–11
disinfection—		
for control of damping-off of conifers	453	6–30, 31–32
with hot water to control root-knot nematode and parasitic soil fungi. L. P. Byars and W. W. Gilbert	818	1–14
eastern Virginia, nature and uses for truck-crop production. J. A. Bonsteel	1005	1–70
effect on forest types in central Rocky Mountains. C. G. Bates	1233	1–152
electrical—		
currents, effect on plant growth	1379	17–21
properties	1452	27–31
erosion. *See* Erosion, soil.		
extension course. A. R. Whitson and H. B. Hendrick	355	1–92
fertility—		
changes on tenant farms	1432 1433	40–41 38
maintenance in Missouri	633	12–14
relation to internal browning of apples	1104	14–16
fractions, noncolloidal absorption from	1122	5–7, 17–18
fungi, parasitic, control by disinfection with hot water. L. P. Byars and W. W. Gilbert	818	1–14
glacial lake deposits, formation	141	7–11
gumbo, Belle Fourche Reclamation Project, water penetration. O. R. Mathews	447	1–12
hill farms in Louisiana, preparation	961	5–10
infection with tobacco mosaic disease	40	24–26
Louisiana, drainage characteristics and subsidence	652	10–14
manganese action in. J. J. Skinner, M. X. Sullivan, J. H. Beattie, F. B. Reid, and H. Winckelmann	42	1–32
Massachusetts and Connecticut, with especial reference to apples and peaches. H. J. Wilder	140	1–73

SULLIVAN, M. X.: The Action of Manganese in Soils. With J. J. Skinner, J. H. Beattie, F. B. Reid, and H. Winckelmann	42	1–32
Sulphate—		
of ammonia, production	37	4
process, pulp making, description and tests	72	3–4, 7–11, 12–14
Sulphite pulp, production from spruce, effect of varying certain cooking conditions. S. E. Lunak	620	1–24
Sulphur—		
colloidal, use in spraying peach trees	1482	22, 23, 26, 29, 30
determination in color of coal-tar dyes	1390	24
dioxide, use in bleaching oats, preliminary study. G. H. Baston	725	1–11
effect on yield of paper pulp	72	20
fertilizer experiments with alfalfa	1418	3–8
fungus, cause of decay in softwoods	1128	35
inoculated, efficacy in barberry eradication	1451	28–29
Sulphuric acid—		
application to nursery soil, method and effect on seeds and roots	169	2–9, 30–31, 34–35
injury to seeds and roots, relation to strength of treatment	169	12–14
manufacture—		
by lead-chamber process, new modification	283	9–14
methods	283	2–5, 14–39
plant, factory considerations	283	13–14
production and proposed new method of manufacture. W. H. Waggaman	283	1–39
use in—		
eradication of barberries	1451	26–27
fertilizers	798	4–5
Sumac—		
American, value as tanning material and dyestuff. F. P. Veitch, J. S. Rogers, and R. W. Frey	706	1–12
disease list	1366	90
extract, prices	706	9
gathering and curing	706	5–8, 12
smooth, habitat, description, and uses	26	9–10
Summer courses, agricultural instruction, list	7	2–6
SUMMERS, J. N.: Effect of Low Temperature on the Hatching of Gipsy-Moth Eggs	1080	1–14

home, forestry lessons on. W. R. Mattoon and Alvin Dille	863	1–46
location and extent, lessons for rural schools	863	9–10
protection, lesson for rural schools	863	20–23
Woodpeckers, banded, returns, 1920–23	1268	30–31

	Bulletin no.	Page
WOODWARD, S. M.:		
Land Drainage by Means of Pumps. With C. W. Okey	304	1–60
The Flow of Water in Drain Tile. With D. L. Yarnell	854	1–50
WOODWARD, T. E.:		
The Effect of the Cattle Tick upon the Milk Production of Dairy Cows. With W. F. Turner and Cooper Curtice	147	1–22
The Influence of the Calcium and Phosphorus in the Feed on the Milk Yield of Dairy Cows. With E. B. Meigs	945	1–28
The Open Shed Compared with the Closed Barn for Dairy Cows. With W. F. Turner, W. R. Hale, and J. B. McNulty	736	1–15
Values of Various New Feeds for Dairy Cows. With H. T. Converse, W. R. Hale, and J. B. McNulty	1272	1–16
Woodwork, injury by the cadelle	1428	8–13
Woodworking, adhesives used, classification and properties	1500	2–4
Wool—		
care of, suggestions	20	47–49
classing, study	313	22–23, 24–28
conditioning for weighing	1100	6–11
cooperative associations, farmers', development and present status	1302	8–66
foreign trade, 1852–1914	296	18–19
graded or classed, selling in Australia and United States	313	29–31
grading, description and importance	206	11–13
grease and dirt, determination method. D. A. Spencer, J. I. Hardy, and M. J. Brandon	1100	1–20
growers and employees, education in Australia	313	31–33
judging, instruction in secondary schools	593	12–13, 29–30
laboratory, Beltsville, Md., fleece improvement studies	1100	1–2, 15–17
market—		
grades	206	14–21
statistics	982	131–142
preparation for market, practices and expenses in Australia	313	23–29
price analysis	1480	40
prices, wholesale, during Civil War and World War periods	999	13, 14, 31
robust, advantages, opinion of Australian wool experts	313	10–13
scouring to remove grease and dirt	1100	2–6, 11–17
sorting, description and importance	206	21–23
trade—		
and the woolgrower. F. R. Marshall and L. L. Heller	206	1–32
terms used, glossary	206	31–32
value, factors determining	206	3–11
washing machine, description and operation	1100	16
Woolgrower—		
and the wool trade. F. R. Marshall and L. L. Heller	206	1–32
rules for	206	29–30
WOOLMAN, H. M.:		
Relative Resistance of Wheat to Bunt in the Pacific Coast States. With W. H. Tisdale, J. H. Martin, F. N. Briggs, W. W. Mackie, D. E. Stephens, E. F. Gaines, and F. J. Stevenson	1299	1–30
Studies in the Physiology and Control of Bunt, or Stinking Smut, of Wheat. With H. B. Humphrey	1239	1–30
Summary of Literature on Bunt, or Stinking Smut, of Wheat. With H. B. Humphrey	1210	1–44
WOOLSEY, T. S., Jr.: Norway Pine in the Lake States. With H. H. Chapman	139	1–42
WOOTON, E. O.:		
Carrying Capacity of Grazing Ranges in Southern Arizona	367	1–40
Certain Desert Plants as Emergency Stock Feed	728	1–31
Factors Affecting Range Management in New Mexico	211	1–39

	Bulletin no.	Page
WOOTON, E. O.—Continued.		
Relation of Land Tenure to Use of Arid Grazing Lands in Southwestern States	1001	1–72
Saltbushes and Their Allies in the United States. With G. L. Bidwell	1345	1–40
Work day, standard, in central Illinois. H. R. Tolley and L. M. Church	814	1–32
WORKMAN, J. M.: Construction and Fire Protection of Cotton Warehouses	801	1–79
Wormholes, timber, cause, description, and control	1490	23–27
Wormseed—		
disease list	1366	34
habitat, description, and uses	26	4–5
oil, emulsions of for destruction of Japanese beetle larvae in roots of perennial plants	1332	4–13
WORTHLEY, L. H.:		
A Progress Report on the Investigations of the European Corn Borer. With D. J. Caffrey	1476	1–155
Solid-Steam Spraying against the Gipsy Moth and the Brown-Tail Moth in New England	480	1–16
Wrens, banded, returns, 1920–23	1268	48–49
WRIGHT, P. A.: Nitrogen and Other Losses during the Ensiling of Corn. With R. H. Shaw and E. F. Deysher	953	1–16
WRIGHT, R. C.:		
Coloring Satsuma Oranges in Alabama	1159	1–23
Comparative Efficiency of Wire-Basket Bunkers in Refrigerator Cars. With R. G. Hill, W. S. Graham, and G. F. Taylor	1398	1–11
Freezing Injury to Potatoes When Undercooled. With G. F. Taylor	916	1–15
Freezing Temperatures of Some Fruits, Vegetables, and Cut Flowers. With G. F. Taylor	1133	1–8
Frost Injury to Tomatoes. With R. B. Harvey	1099	1–10
The Efficiency of a Short-Type Refrigerator Car. With R. G. Hill and W. S. Graham	1353	1–28
The Freezing Point of Potatoes as Determined by the Thermoelectric Method. With R. B. Harvey	895	1–7
WRIGHT, SEWALL:		
Corn and Hog Correlations	1300	1–59
Effects of Inbreeding and Crossbreeding on Guinea Pigs. I and II	1090	1–63
Effects of Inbreeding and Crossbreeding on Guinea Pigs. III	1121	1–61
Principles of Live-Stock Breeding	905	1–67
WYOMING—		
Archer Field Station, soil and climate	1315	1–4
Cheyenne Experiment Farm, cereal experiments. J. W. Jones	430	1–40
Experiment Station, bulletins, list—		
1891–1920	1199	183–185
1921–22	1199, Supp. 1	24
1923–24	1199, Supp. 2	28
1925–26	1199, Supp. 3	30
game laws, 1913	22	17, 34, 42, 46, 50, 58
irrigation—		
and drainage laws	1257	18, 25
districts and their statutory relations	1177	4, 5, 11, 16, 19, 26, 31, 33, 53
lumber cut, 1870–1920, value and kinds	1119	28, 30–35, 54, 57, 59
oats, yields of several varieties	823	46–47, 49
Sheridan Field Station, work, 1917–23. R. S. Towle	1306	1–30
southeastern, dry farming. A. L. Nelson	1315	1–20
wheat—		
acreage by varieties	1074	217
varieties and acreage, 1919, 1924	1498	23

	Bulletin no.	Page
Xanthium spp.—		
poisonous plants. C. D. Marsh, G. C. Roe, and A. B. Clawson	1274	1–24
See also Cockleburs.		
Yakima Valley—		
apple industry, history and development	614	4–8
apples, production cost. G. H. Miller and S. M. Thomson	614	1–75
codling moth in, life history. E. J. Newcomer and W. D. Whitcomb	1235	1–77
Yam(s)—		
cooking directions	1167	13–14
description and importance as food	1167	1–4
greater—		
description and growing	1167	4–10
varieties and uses	1167	10–15
name and use	123	27
true, cultivation in the Gulf region. R. A. Young	1167	1–16
use as food	468	23–24
See also Sweetpotato(es).		
Yarding, logs, in California, costs and losses	1402	24–38
YARNELL, D. L.—		
Excavating Machinery Used in Land Drainage	300	1–39
Report upon the Cypress Creek Drainage District, Desha and Chicot Counties, Ark. With S. H. McCrory, O. G. Baxter, L. A. Jones, and W. J. Schlick	198	1–20
The Flow of Water in Drain Tile. With S. M. Woodward	854	1–50
Yarns, cotton—		
bleaching—		
and dyeing tests	990	6–10
dyeing, and mercerizing, tests	359	11–16, 20
tests	591	18–21
breaking strength—		
and irregularity of superior varieties	1148	4–5, 6
from bales of different densities	1135	7–8, 10–11, 13–15, 17–18
finishing properties	1488	26–28
irregularity	1488	15–21
sizing variations	1488	21
spinning requirements	1444	6–8, 14
strength tests	990 1488	5–6 7–21
tensile strength—		
of different grades	1444	7–8
tests	62	1–8
Yautia(s)—		
description and uses	1247	17–22
promising new food plants for the South. R. A. Young	1247	1–24
Yazoo-Mississippi Delta, tenant systems of farming, study. E. A. Boeger and E. A. Goldenweiser	337	1–18
Yeast—		
pink—		
biochemical and physical features	819	12–20
cause of spoilage in oysters. A. C. Hunter	819	1–24
distribution in relation to oysters, studies	819	3–10
morphology and cultural features	819	11–12
resistance to disinfectants	818	20–21
tomato products	581	3–8, 14–16, 18–20, 22, 23
use	123	49
YEAW, F. L.: Cantaloup Marketing in the Larger Cities, with Car-Lot Supply, 1914. With W. A. Sherman and A. D. Gail, Jr	315	1–20

	Bulletin no.	Page
Yerba maté—		
description and use in Argentina	1409	57
production in Paraguay, and exports	1409	87
YERKES, A. P.:		
Cost of Harvesting Wheat by Different Methods. With L. M. Church	627	1–22
Farm Experience with the Tractor. With H. H. Mowry	174	1–44
Yew—		
treatment with creosote as preservative	101	18
trees, family relationships and generic characteristics	680	39–44
YODER, P. A.:		
Influence of Cultural Conditions on Quality and Yield of Sirup	1370	3–9
Sugar-Cane Culture in Sirup Production in the United States	486	1–46
YOTHERS, W. W.:		
Bordeaux-Oil Emulsion. With J. R. Winston and J. J. Bowman	1178	1–24
Mixing Emulsified Mineral Lubricating Oils with Deep-Well Waters and Lime-Sulphur Solutions. With J. R. Winston	1217	1–6
Some Reasons for Spraying to Control Insect and Mite Enemies of Citrus Trees in Florida	645	1–19
The Camphor Thrips. With A. C. Mason	1225	1–30
YOUNG, G. J.: Potash Salts and Other Salines in the Great Basin Region	61	1–96
YOUNG, H. D.: Loss of Nicotine from Nicotine Dusts during Storage. With C. C. McDonnell	1312	1–15
YOUNG, R. A.:		
Cultivation of the True Yams in the Gulf Region	1167	1–16
Taros and Yautias: Promising New Food Plants for the South	1247	1–24
YOUNG, T. B.: American-Grown Paprika Pepper. With R. H. True	43	1–24
Yucatan, henequen fiber production, and in Campeche. H. T. Edwards	1278	1–20
Yucca, disease list	1366	107
Yugoslavia, agricultural situation, pre-war and 1920–22	1234	93–111
Yukon, game laws, 1913	22	36, 42, 47, 50, 59
Yuma Field Station, fertilizer experiments with alfalfa, 1919–25. H. L. Westover and E. G. Noble	1418	1–11
Yuma Valley, description	654	11–13
Zacaton—		
distribution, habitat, and root production	309	6–10
micromeasurements and chemical investigation	309	14–17
paper-making material. C. J. Brand and J. L. Merrill	309	1–28
papers, physical tests	309	25–26
pulp production, laboratory tests	309	10–14
Zanthoxylum spp., habitat, description, and uses	26	8–9
ZAPOLEON, L. B.:		
Geographical Phases of Farm Prices: Corn	696	1–53
Geographical Phases of Farm Prices: Oats	755	1–28
Geography of Wheat Prices. Summary of Conditions Affecting Farm Prices of Wheat in Different Parts of the United States	594	1–46
Zea mays. *See* Corn; Maize.		
ZELLER, J. H.: Some Results of Soft-Pork Investigations, II. With O. G. Hankins and N. R. Ellis	1492	1–50
ZETEK, JAMES:		
Damage by Termites in the Canal Zone and Panama and How to Prevent It. With T. E. Snyder	1232	1–26
The Black Fly of Citrus and Other Subtropical Plants. With H. F. Dietz	885	1–55

	Bulletin no.	Page
ZIMMERMAN, C. W.: Tests of Western Yellow Pine Car Sills, Joists, and Small Clear Pieces	497	1–16
Zinc arsenite—		
composition	1147	10
use with cactus solution against cucumber beetle, experiments	160	2–4, 10–11, 18
Zinnia, disease list	1366	108
Zirconium, occurrence in soils	122	4, 8–9, 27
Zizanieae, genera of, key and descriptions	772	18, 206–212
ZON, RAPHAEL:		
Balsam Fir	55	1–68
Research Methods in the Study of Forest Environment. With C. G. Bates	1059	1–209
Seed Production of Western White Pine	210	1–15
Timber Growing and Logging Practice in the Lake States	1496	1–64
ZOOK, L. L.: Tests of Corn Varieties on the Great Plains	307	1–20
Zygadenus—		
cause of losses of livestock	125	6
description	125	4–6
elegans, description, distribution, and experimental feeding	1012	16–25
nuttallii as a poisonous plant. C. D. Marsh, A. B. Clawson, and G. C. Roe	1376	1–14
or death camas. C. D. Marsh, A. B. Clawson, and Hadleigh Marsh	125	1–46
paniculatus—		
and *Z. elegans*, the death camas species as poisonous plants. C. D. Marsh and A. B. Clawson	1012	1–25
description, distribution, and experimental feeding	1012	2–15
poisoning—		
experiments	125	7–43
remedies	125	37–44
spp., comparative toxicity	125 1012 1376	35–36 1–2, 15, 24–25 9–10
spp., description and effect on range stock	1245	4–5
venenosus—		
as a poisonous plant. C. D. Marsh and A. B. Clawson	1240	1–14
description, distribution, and feeding experiments	1240	2–13
See also Death camas.		
Zygobothria nidicola—		
life history and biology	1088	2–9
parasite of browntail moth. C. F. W. Muesebeck	1088	1–9
